DETAILED ACTION

Applicant's election with traverse of 11/20/06 in the reply filed on 10/25/06 is acknowledged. The traversal is on the ground(s) that all groups are related to each other that an undue burden would not be placed upon Examiner. This is not found persuasive because the invention of Group I is not related to the invention of Group II so that they are classified in different classes. Thus, searching in different classes would place burden on Examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claims 12-14 should be canceled accordance with the Selection filed on 11/20/06.

Abstract

The Abstract is objected to because it does not comprise a single paragraph in a separate sheet as required. Correction is required.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

CLAIM REJECTIONS

Claim Rejections - 35 U.S.C. § 112

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for

failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Appropriate correction or clarification is required.

In claim 1, it is unclear how the correcting section can “automatically” correct a wave when it is not connected to anything. The same is true for claim 10.

In claim 5, the recitation “the electrical charge” on line 5 lacks clear antecedent basis. It is unclear where it comes from.

The remaining claims are dependents from the above claims and therefore also considered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 10 are rejected under 35 USC 102 (b) as anticipated by Burke (US 5,557,241).

As the best construed, Burke discloses in Figure 2 a circuit comprising:

- an inherent reference signal section (not shown) for generating a reference signal SLO-Trigger having a predetermined frequency;
 - a sawtooth wave forming section (10, 12, 34, 46) for generating a sawtooth waveform;
- and
- a correcting section (18, 24, 38)) for correcting a slope of the sawtooth waveform.

Allowable Subject Matter

Claims 2-9 and 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

These claims are allowed because the prior art of record fails to suggest the correcting section comprising the voltage comparator and the phase comparator as combined in claims 2 and 11 and the reference signal generator including a PLL circuit as combined in claim 4.
